Property Tax & Millage Rates

The State of Arkansas does not have a property tax; however, Arkansas cities and counties do collect a property tax, which is the principal source of revenue for funding local public schools.

The tax is calculated based on 20% of the fair market value of real and personal property and the average annual value of merchants' stocks and/or manufacturers' inventories based on millage rates in individual school districts. Business firms and individuals are subject to annual property tax on all real and personal property.

The annual tax rate is the aggregate of all levies for county, municipal, school and other special district purposes within constitutional and statutory limits. School district rates are not limited but are subject to approval each year by the voters in each school district.

Shown below are rates per \$1,000 of assessed valuation (20% assessment ratio) assuming residency within the city limits of each community. Millage rates can vary according to several factors including school districts within the city.
